Technical Skills

Languages: Dart, JavaScript, Python

Mobile & Web: Flutter, iOS/Android Development, React, REST APIs, WebRTC, WebSocket

Tools & Cloud: Xcode, Android Studio, Git, AWS, Firebase, CI/CD, Selenium, Stripe, Razorpay

Professional Experience

Software Engineer May 2025 – Present
Verisage Ai Delhi, India

- Developed WebRTC and WebSocket solutions from scratch, integrating with backend APIs for peer-to-peer connections, reducing third-party dependency and achieving 35% cost reduction.
- Implemented Firebase Cloud Messaging with analytics integration, resulting in 29% increase in user engagement.
- Published multiple iOS/Android applications to App Store and Play Store while ensuring compliance with publishing guidelines. Resolved 100+ critical issues through testing and troubleshooting.
- Integrated Stripe and Razorpay payment gateways for in-app purchases, increasing successful transaction rates by 35%.

Flutter Developer Feb 2024 – August 2024
Dharmik App Noida, India

- Implemented key features such as deep links and optimizing data flow to efficiently manage large volumes of data, resulting in a 30% improvement in app loading times.
- Implemented Bloc Cubit for efficient state management, boosting app performance, leading to a 4.8 Play Store rating.
- Built Flutter application with agile processes, data persistence, and API integration, improving app loading times by 30%.

Projects

JobsWorld - AI-Powered Job Search & Career Platform *Live App Link*
Technologies: Flutter, REST APIs, Dart

- Job discovery Flutter application that enables users to explore job opportunities, manage applications, and streamline their career search experience through a modern and scalable mobile interface.

Dexterous - On-Demand Cleaning Service Booking Platform *Live App Link*
Technologies: Flutter, REST APIs, Dart

- Home service scheduling by developing a Flutter application that allows users to book professional cleaning services, manage appointments, and enhance customer convenience through an intuitive mobile experience.

Auto Reply - AI-Powered Social Media Auto-Response App *Live App Link*
Technologies: Flutter, REST APIs, Getx

- Solved the challenge of multi-platform communication delays by developing a comprehensive Flutter application that leverages NLP to generate personalized auto-replies using contextual understanding.

Education

Bachelor of Technology in Computer Science August 2021 – June 2025
ITM University Gwalior, MP, India

Open Source Contributions

- Contributed to CCExtractor ultimate alarm clock project: resolved critical defects, implemented configurable undo interval, and developed swipe-to-delete undo mechanism (#170, #378, #314, More contributions).
